

Science

Forces and
Magnets

Year 3

Lesson 1: To describe the effect of contact forces.

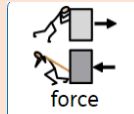

Lesson 2: To recognise the effects and uses of forces.

Lesson 3: To interpret how and why things move differently on different surfaces.

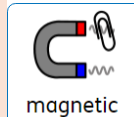

Lesson 4: To describe the effects of magnets.

Lesson 5: To compare the properties of different types of magnets.

Lesson 6: To explain the uses of magnets.

A physical action or movement

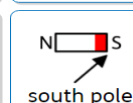

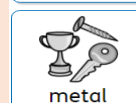

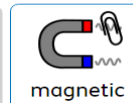

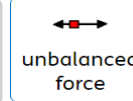

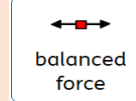

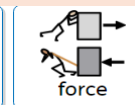

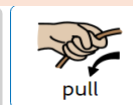

A material that attracts to a magnet

A material that does not attract to a magnet

The resistance caused when two surfaces move against each other

Metacognitive statements:

I can remember... I can use...

I can understand... I can explain... I know that...
