

Prior learning: Are all settlements the same?

What we are learning					
Lesson 1: How can our food choices effect the environment?	Lesson 2: What does it mean to trade responsibly?	Lesson 3: How do we get our chocolate?	Lesson 4: Where does our food come from?	Lesson 5: Are our school dinners locally sourced?	Lesson 6: Is it better to by local or imported food?

Key vocabulary	
Food miles	The distance food has travelled to reach you.
Import	An item bought in from a different country.
Consume	To buy, use or eat.
Trade	The buying and selling of goods and services
Cooperative	A group of people who live together who share ideas and income.
Responsible trade	A process to ensure workers have a voice, can get the best deal for their product and work in safe conditions.
Seasonal food	Food which is eaten in a particular season.
Sustainability	A way of doing something that does not harm the environment.
Source	A place where something can be originally found.

Map of biomes

Different foods require different conditions, such as temperature, rainfall, type of soil and amount of sunlight. Therefore, each biome's unique conditions mean that only certain food can grow there.
